

# As a business customer

Are you considering 5G?

5G is being communicated as faster and better than 4G with extreme broadband speeds – and new 5G smartphones are coming on the market. However, 5G is much more than even better broadband and smartphones for consumers. For society or an enterprise, 5G has much greater promises.

Have you considered what 5G can do for your business? ... and when you can get it? ... and are you prepared?

## Some 5G promises:

- 10x faster
- 1 Gbps speeds
- 10x lower latency
- Massive IoT
- Digitalization of society
- Smart factories
- Remote monitoring & control
- Autonomous vehicles
- Virtual or Augmented reality
- Immersive gaming
- etc

## Short check list:

### **What would you consider 5G for?:**

- Upgrading your smartphones?
- Business applications?
- for remote monitoring or control?
- of critical systems?
- of a larger number of sensors?
- for instant response / time-critical applications?
- for reliable broadband / video communication?
- To replace cabling?
- on premises?
- on work sites?
- Other?

### **Are you ready for it?**

- Do you know what 5G can do for you?
- Do you know what is available now? ... or later?
- Do you have a capable team?
- to plan it?
- to manage a procurement process?
- to get it implemented?
- Do you need tight control of your 5G network?
- Would you wish to own and manage the network yourself?
- Would you need a tight SLA? ... and what type of SLA?

### **Business applications:**

- Would you wish to automate business processes?
- Do you need an end-to-end business solution based on 5G?
- Would you need to integrate existing business applications?

OpenSky Consulting has long experience on mobile solutions, strategically, technically and business-wise – and we offer advisory services relating to the use of 5G. We do not sell 5G, but if you need independent advice on planning or using 5G, we are there for you!
